
Hackathon Tracks and Presentation Criteria

HACKATHON TRACKS

TRACK 1
Study Smarter

Tools that improve how students learn

- Active recall tools
- Flashcard/quiz generators
- AI study buddies
- Note summarizers

Examples

- Upload notes to generate quizzes
- AI explains topics at your pace
- Visual study maps
- Automation tools for repetitive tasks

TRACK 2
Build Better Routines

Tools that help consistency and balance

- Habit tracker
- Time management
- Burnout prevention

Examples

- Pomodoro/task manager
- Sleep-friendly study planners
- Break reminder systems
- Workload planners and dashboards

TRACK 3
Campus Life Tools

Productivity for real student environments

- Campus-specific tools
- Student support tools
- Community & collaboration

Examples

- Study space finder
- Event planners
- Resource locators

PRESENTATION CRITERIA

Presentation Info

Presentation Requirements

- **Presentations will be 5 to 10 minutes long.**
- **Please prepare a slide presentation with a demo section for your project.**

Presentation Template Examples

- [Slidesgo]
- [Slides Carnival]

Technical Depth

- **Does the project feel sophisticated and well-built?**
- **Does it seem capable of handling real-world use (e.g. multiple users, different scenarios)?**
- **Does the team clearly understand how their system works?**

Creativity & Originality

- Is the idea unique?
- Does it approach the problem in a clever or unexpected way?
- Does it strongly reflect the competition theme?

Real-World Impact

- Is the problem being addressed meaningful or important?
- Could this realistically help students or improve lives?
- Is there a clear target audience?

Quality & Usability

- Is the design clean and visually appealing?
- Is it easy to understand and use?
- Does it work smoothly during the demo?

Presentation & Clarity

- Was the explanation clear and easy to follow?
- Did the team communicate their idea confidently?
- Were visuals and demonstrations helpful?
